Profile

Motivated and detail-oriented Information Technology undergraduate with strong experience in full-stack development, AI-based systems, and software engineering projects. Skilled in designing scalable web applications, integrating APIs, and working with modern frameworks such as React.js, TypeScript, and Laravel. Passionate about building intelligent, real-world solutions using machine learning, IoT, and web technologies. Strong team player with excellent problem-solving and analytical thinking abilities.

Education

Sri Lanka Institute of Information Technology (SLIIT) B.Sc. (Hons) in Information Technology Expected Graduation: 2026	2022 – Present
Chavakachcheri Hindu College G.C.E. Advanced Level – Physical Science Stream	2020

Experience

Full Stack Engineer Intern – Navicode - Developed full-stack web applications using modern technologies - Designed user-friendly interfaces using Figma - Built REST APIs and backend services - Worked with databases and performed data analysis - Used Git and followed Agile development practices	Jan 2025 – Sep 2025
Software Engineer Intern – Teceze - Developed E-commerce platforms including Field Techy and Trincos systems - Built responsive applications using React.js and TypeScript - Integrated APIs and managed version control using Git/GitHub - Performed manual testing and bug fixing to ensure system reliability	Nov 2025 – Feb 2026

Freelance Projects

- Developed a Vehicle Sales Management System with client and admin panels
- Built responsive web applications using React.js and TypeScript
- Implemented API integration, vehicle management features, and UI enhancements
- Improved performance, debugging, and application stability
- Tech:** React.js, TypeScript, Git/GitHub
- Price Calculator App | Car Listing Platform

Projects

Final Year Project – AI Pest Prediction System

- Developed AI-based pest detection system using IoT and Machine Learning
- Used Random Forest and CNN models for prediction
- Collected real-time environmental data using ESP32, BMP280, and LDR sensors
- Implemented image-based pest detection using crop and pest images

- Integrated ML models with a web application for real-time predictions
- Tech: Python, TensorFlow, React.js, TypeScript
- Live Demo

ERP System for Startup Company

- Developed complete system from requirements to deployment
- Frontend: React.js Backend: Laravel Database: MongoDB
- Designed UI/UX using Figma

Hotel Management System

- Built employee management system using MERN stack

Online Food Order System

- Developed web application with payment functionality using PHP

Online Customer Care System

- CRM system using Java and MongoDB

Mobile Applications

- Multi Math Quiz Game (Android)
- TODO App using SQLite

Technical Skills

Programming: Python, Java, C++

Web: HTML, CSS, JavaScript, PHP, MERN Stack, Laravel, React.js, TypeScript

Databases: MongoDB, SQL Server, SQLite

Tools: Git, GitHub, Figma, Power BI, R Studio, Android Studio

Cloud: Firebase, AWS (Basics)

Certifications

- Web Design – University of Moratuwa
- JavaScript Specialist – Developers Stack Academy
- Data Structures and Algorithms Bootcamp (Python)

Soft Skills

Teamwork, Communication, Problem Solving, Time Management, Analytical Thinking

Languages

Tamil (Native), English (Professional), Sinhala (Basic)

Referees

Dr. Kapila Dissanayaka
